## Company Background

Established in 2009 under the name Komasi Construction Pte. Ltd., Konnection Engineering Pte. Ltd. (A wholly-Owned Subsidiary Company of UUE Holdings Berhad) has evolved with a clear mission: to become the favored service provider for Trenchless Technology, specifically Horizontal Directional Drilling (HDD), installations in Singapore. In response to the growing trend of utilities being situated deeper below the surface in Singapore, the challenges for precise and efficient installations have amplified, necessitating advanced solutions.

Officially recognized by the Building Construction Authority (BCA), Konnection Engineering holds an impressive Grade L4 in CR07, which encompasses Cable/ Pipe Laying & Road Reinstatement. This acknowledgment reinforces the company's credentials as a reputable industry player. Furthermore, the achievement of the Bizsafe Star from the WSH Council underscores the company's unwavering commitment to workplace safety and health.

What truly sets Konnection Engineering apart is their dedicated team, composed of passionate individuals. With a wealth of accumulated knowledge and substantial experience in the field, these professionals are equipped to tackle the challenges of the industry with confidence and proficiency.

## Our Vision

A regional preferred provider for trenchless solutions that contribute to environmental sustainability.

## Our Mission

We are committed to delivering excellent service through the adoption of technology and best practices to meet all our customers' unique needs.

## Our Services

Konnection Engineering Pte. Ltd. is a leading provider of horizontal directional drilling (HDD) services, specializing in HDD large-diameter rig (maxi-rig), HDD medium-diameter rig (midi-rig) and HDD small-diameter (mini-rig) installations. HDD is a trenchless method widely used for underground pipeline and utility installations, known for its minimal environmental impact and precision in navigating obstacles.

Our core services encompass HDD maxi-rig for submarine cable and pipe installations, as well as HDD mini and midi-rig for underground utilities. We also excel in open cut trenching for pipe installation and Power Cable Installation. With expertise in both underwater and land-based HDD projects, we employ innovative techniques to minimize environmental impact while ensuring precise pipeline and utility installations.

Safety and excellence are paramount in our Power Cable Installation services, ensuring secure and efficient electrical power transmission. Serving clients in construction, pipeline, and utility sectors across Singapore, with a strong local market focus, we are sought after for numerous projects, showcasing our commitment to delivering innovative, effective, and environmentally responsible solutions for subterranean installations within Singapore's urban landscape.

### ❖ Subsea Horizontal Directional Drilling (Shore Approach)

Subsea HDD is employed when we have to bury subsea pipe conduit beneath the seabed to facilitate the installation of power/fibre optic cables from the sea to land (shore). This involves drilling and installing pipe conduit underground protecting the shore above. Firstly, a pilot borehole is drilled from the shore under the beach towards the intended exit point. Drilling can be controlled precisely keeping the bore path below the surface until the drill bit emerges from the seabed. Next, the drilling rig pulls back the conduit pipe (after reaming) from a barge through the borehole. A winch will then be set up on the onshore work site to pull back the cable from a cable lay vessel through the conduit pipe to the shore. Finally, the end of the cable on land is connected to onshore cable in an underground joint bay whereby a manhole will be installed for future access. In most cases with fibre optic cables, the drill pipes which are used for drilling the initial borehole may be left underground to serve as conduit pipes for cables installation. With our latest investment in state of the art HDD rig and equipment coupled with our experienced crew, Konnection Engineering Pte Ltd is capable of successful delivery of major subsea HDD works.

### ❖ Underground Utilities Horizontal Directional Drilling

We extend our proficiency to mini and midi-rig HDD services, offering innovative solutions for underground utility installations with a strong focus on environmental responsibility, employing HDD medium-diameter (midi-rig) and HDD small-diameter (mini-rig) techniques.

#### ❖ **Open Cut for Pipe Installation**

With a proven track record in open cut trenching, we excavate the ground to facilitate pipeline installations while ensuring thorough inspection, repair, and replacement of pipeline infrastructure.

#### ❖ **Power Cable Installation**

Konnection Engineering is dedicated to the safe and effective installation of power cables, ensuring the reliable transmission and distribution of electricity.

---

### **Where Safety and Sustainability Meet Excellence**

---

By prioritizing safety, Konnection Engineering Pte Ltd not only protects their workforce but also demonstrates professionalism and a strong sense of social responsibility. This approach can lead to successful project outcomes, positive client relationships, and a safer working environment for all involved.

With a steadfast commitment to excellence, safety, and environmental consciousness, we proudly serve diverse industries, delivering tailored solutions that meet your specific infrastructure requirements.

Our commitment to sustainability and responsible practices is reflected in our care for environmental factors, such as preventing soil erosion, managing waste materials properly, and preventing damage to natural habitats.

## Our Management Team

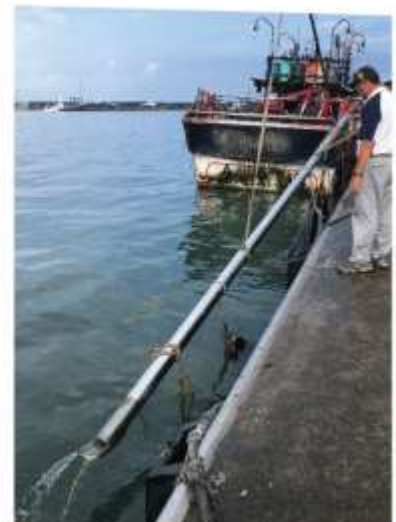

## Business Scope

Konnection Engineering Pte Ltd are providing project planning, technical services, engineering support, logistics, implementation and commissioning for the following job scope :-

- General construction and installations including telecommunications infrastructure, civil engineering works, electrical power supply and underground installations.
- Telecommunication infrastructure network job including civil works and trenchless works using Horizontal Directional Drilling (HDD) method.

## Scope of Services

### Subsea – Horizontal Directional Drilling Works

## Scope of Services

### Underground Utilities – Horizontal Directional Drilling

## Underground Utilities – Horizontal Directional Drilling

## Pipe Laying Works

## Trial Hole Works
